- 2. Website and Editors
- 3. Markdown Syntax
- 4. Converting report.txt Demo

Markdown

Created by John Gruber in 2004

Markdown allows you to write using an easy-to-read, easy-to-write plain text format, then convert it to structurally valid XHTML (or HTML).— John Gruber

BUT there are a lot of variations out there...

Reasons for Markdown

- Easier to read markdown documents
- Easier to remember syntax
- · Easier to markup as you are writing
- Integrate programming with documentation

Results in:

- Fewer errors are made
- Allows focus on continually creating content
- Can convert to HTML that is valid or other formats

HTML vs Markdown

HTML

```
<h1>Why <em>you</em> should use Markdown to write your next blog
post</h1>
```

```
<a href="http://daringfireball.net/projects/
markdown/">Markdown</a> is just so dang legible, it will make
your <em>whole life</em> easier. <strong>I promise.</strong>
```

Markdown

```
# Why *you* should use Markdown to write your next blog post
```

```
[Markdown][1] is just so dang legible, it will make your *whole
life* easier. **I promise.**
```

Site That Use It

- Wikipedia (http://www.wikipedia.org)
 - · Used to write all encyclopedia articles
 - Has add-ons like math notation, tables (<u>Creole</u>)
- GitHub (https://github.com)
 - Use to write rich help files
 - Has its own extensions: https://help.github.com/
 articles/github-flavored-markdown/
- Torchpad (https://torchpad.com)
 - · Use markdown do create your own wiki
 - · Work with others to create an

Editors

- Mac OSX and iOS Editors:
 - iA Writer Po: http://writer.pro
- Windows Editors:
 - MarkdownPad: http://markdownpad.com
- Online Editors:
 - Dingus: http://daringfireball.net/projects/markdown/dingus
 - Dillinger: http://dillinger.io

R Markdown: http://rmarkdown.rstudio.com

Headings

```
# Heading
## Sub-heading... (up to 6 # characters)
OR
This is an H1
This is an H2
```

Numbered Lists

- 1. Ordered list item
- 8. The number used is not important
- 1.1. A nested list item...
 - 1. A tab-nested list item...

Bulleted Lists

- * Unordered list item
- You can also use or +
- ** A nested list item...
 - * A tab-nested list item...

Task Lists

- [] An uncompleted task list item
- [x] A completed task list item
- -- [x] A nested task list item...
 - [x] A tab-nested task list item...

Inline Formatting

```
*Asterisks* or _underscores_ for emphasis (=italic).
```

```
Two **asterisks** or __underscores__ for strong (=bold).
```

~~Double tildes~~ for strikethrough.

`Backticks` for code (other inline formatting in code is not exported).

Links

```
Inline link: [iA Writer Pro's website]
(http://www.writer.pro/)
```

Reference link: [iA Writer Pro's website] [wp]. The reference link URL can be at the end of the document, for example:

```
[wp]: http://www.writer.pro/
```

Links, continued

```
I get 10 times more traffic from [Google]
[1] than from [Yahoo] [2] or [MSN] [3].

[1]: http://google.com/ "Google"
[2]: http://search.yahoo.com/ "Yahoo!"
[3]: http://search.msn.com/ "MSN Search"
```

Footnotes

A footnote has a caret and number[^1]. Then add the URL like a reference link, for example:

[^1]: The number is not important.

Images

```
Image: ![iA Writer Pro's logo](http://
www.writer.pro/logo.png)
```

Reference link image: ![iA Writer Pro's logo][logo]. The image URL can be at the end of the document, for example:

```
[logo]: http://www.writer.pro/logo.png
```

Blockquotes

- > A blockquote
- >> A nested blockquote

Blockquotes can contain other Markdown elements:

> ## This is a header.

Code Blocks

A code block (four spaces or a tab at the start of a line).

Formatting in space-indented code blocks is *ignored*.

OR

. . .

A fenced code block begins _and_ ends with triple backticks.

Horizontal Rules

Any combination of three or more asterisks or hyphens, with optional spaces, on a line. For example:

```
* * *
```

Summary

Markdown is a simple less cluttered way of adding structure to content.
